ADDITIONAL NOTES

- This is an example of an in home ABA therapy schedule for a child prescribed 30 hours of ABA Therapy. ABA therapy session times may vary due to family or staffing availability.
- For this example Jane, Susie, and Joe are the Behavior Interventionists on the child's care team.
- The family vacation sessions were made up the following Saturday to maintain 30 hours per week of ABA therapy. It's important to follow the prescribed number of hours per week in your child's care plan. Try to make up sessions if some are missed.
